

The sustainable local and rural development should contribute to the social cohesion. But due to the wide regional and urban-rural development gap, MCIC will pay special attention to this goal. MCIC will support the capacity building of local-self-governments and other forms of sustainable local and rural development by improving the public services for inhabitants of the local and rural communities, the local and rural infrastructure and inter alia, by utilizing the available EU's assistance for this sphere.

Programmes:

- [Local Community Development](#)
- [Water Supply in Jegunovce Municipality](#)
