

In the period from 2007 to 2015 MCIC with financial support from Socotab Switzerland and its partners successfully completed 20 shares for renovation of rural primary schools, from pre-selected municipalities where mostly oriental tobacco is grown.

General objective is improved learning conditions and work for students and staff in primary schools.

The **aim** is, the conditions in primary schools are at acceptable standards in accordance with the size and needs of the school.

The **activities** include: Development of technical documentation and its revision; Preparation of the entire documentation for support and funding of projects; Development and implementation of tenders for selection of contractors and professional supervision; Coordination and cooperation with all stakeholders; Observation and monitoring of the works; Reporting (current and final) and evaluation.

The **target group** are students and staff in primary school.

All projects are realized in close **cooperation** with representatives of municipalities, primary schools and Sokomak.
